Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over the newly cited Korean publication 2001036727 in view of Kim, of record. (A copy of the complete publication was not available to the examiner at the time this action was written, and the rejection is based on the available abstract of the publication. A complete copy will be provided in the next office action).

The abstract of the 2001036727 publication appears to show a device similar to that of applicants' claimed invention, including a primary insulating layer disposed over the source/drain, a primary gate disposed on the primary insulating layer, a secondary insulating layer (24) disposed on the primary insulating layer, and a secondary gate (25) disposed on the secondary insulating layer. This structure would appear to produce a device having a thicker gate insulator layer in the vicinity of the source/drain regions.

Kim, of record, also shows a device having primary and secondary insulating layers, along with primary and secondary gates disposed on the insulator layers. Kim also teaches the use of the well known metals and insulating materials being claimed. One skilled in the art would be motivated to combine the teachings of these references in order to utilize the more optimal insulated secondary gates shown in 2001036727 in the device of Kim which also makes use of such insulated secondary gates.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Wojciechowicz whose telephone number is 571-272-1739. The examiner can normally be reached on Monday through Thursday.
